EDUCATION

Savitribai Phule Pune University

Pune, India

Bachelor of Computer Applications

Expected Graduation, May 2026

- **Concentrations:** Full Stack Web Development, Artificial Intelligence, and Cloud Computing
- **Related Coursework:** Object-Oriented Programming, Modern Web Development (React, Next.js, Node.js, Express.js), ORMs with Mongoose and Prisma, RESTful API Development, and AI Integration in Web Applications

EXPERIENCE

IntelliSuite Technologies ([Live](#)) ([Github Link](#))

Remote

Freelance Full Stack Developer

Sep 2025 – Oct 2025

- Developed and deployed a responsive, high-performance business website (intellisuite.in) using Next.js, improving page responsiveness by 40% and load time by 1.5x.
- Used Resend for email automation and contact form integration, enabling seamless client communication and lead management.
- Deployed and optimized the site on GoDaddy, achieving 99.9% uptime and seamless performance across all devices

Adam Software

Remote

Frontend Developer (Freelance Project)

Oct 2025 – Present

- Used Next.js to build a responsive and SEO-optimized frontend, improving page load performance by 35% and enhancing overall accessibility.
- Designed a modern UI with Tailwind CSS, ensuring a consistent experience across 15+ components and all major screen sizes.
- Collaborating with the client to refine features and streamline frontend workflows, resulting in 20% faster development cycles and improved scalability.

PROJECTS

Codium – Virtual AI Cloud-Based IDE ([Live](#)) ([Github Link](#))

Aug, 2025

- Developed an AI-powered cloud IDE that transforms natural language prompts into full React applications, automating project setup and reducing manual effort by 60%.
- Integrated Gemini/OpenAI APIs in an isolated sandbox environment to enable real-time code generation, testing, and deployment, improving developer productivity by 45%.

NotebookLM — AI-Powered Knowledge Rack ([Live](#)) ([Github Link](#))

Sep, 2025

- Built an AI-driven knowledge platform using Next.js that generates and stores embeddings for multiple file types (PDF, DOCX, TXT) and web links in Qdrant, enabling intelligent context-based retrieval.
- Integrated LangChain with Gemini/OpenAI APIs to create adaptive chatbots from uploaded content and website links, enhancing information retrieval efficiency by 50% and user engagement by 30%.

SKILLS

Programming: JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js

Databases: MongoDB, PostgreSQL, Prisma ORM

Tools & Platforms: Git, Linux, Windows, GoDaddy, Vercel

Languages: English, Hindi
